

SAKSHI KUMARI

Ghaziabad, UP | +91 9798291667 | sakshikumari.032005@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

B.Tech CSE (AI & ML) student with hands-on experience in full-stack development, machine learning, generative AI, and cloud computing. Proficient in Python, JavaScript, RESTful APIs, and the MERN stack. AWS Certified Cloud Practitioner with exposure to LLMs, RAG pipelines, and data-driven application development. Aiming to build scalable, impactful tech solutions across software engineering and AI.

EDUCATION

KIET Deemed to be University, Ghaziabad | B.Tech CSE – AI & ML | CGPA: 7.99

2024 – 2028

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, HTML, CSS

Frameworks: React.js, Node.js, Express.js, JSP, LangChain, scikit-learn, NumPy, Pandas

Databases: MongoDB, MySQL, FAISS (Vector DB)

Cloud & Tools: AWS (Certified), Git, GitHub, FastAPI

AI / ML: Machine Learning, RAG, LLMs, Transformers, Data Preprocessing, GenAI

Core CS: Data Structures & Algorithms, RESTful APIs, CRUD, Role-Based Authentication

PROJECTS

DocuMind – AI Document Q&A System | React.js, FastAPI, LangChain, FAISS, Sentence-Transformers, Groq API

[GitHub](#)

- Built a full-stack RAG-based PDF Q&A system using LLaMA3-8b via Groq API; evaluated on 31-query domain-specific test set achieving 0.51 semantic similarity score (sentence-transformers/all-MiniLM-L6-v2).
- Engineered end-to-end document ingestion pipeline with LangChain text splitter, Sentence-Transformers embeddings, and FAISS vector store; measured avg end-to-end response latency of 35.9s on free-tier deployment.
- Developed FastAPI REST backend with session-based /upload and /ask endpoints and React.js chat interface; deployed on Railway and Vercel with environment-secured Groq API integration and source citation display.

Darshan Ease – Temple Visitor Management | MERN Stack

[GitHub](#)

- Built a full-stack MERN web app for temple visitor scheduling with responsive React.js frontend and RESTful Node.js/Express.js backend APIs.
- Implemented CRUD operations and optimized MongoDB data models for efficient visitor record management.

Complaint Management System | MERN Stack, JWT Auth

[GitHub](#)

- Developed a full-stack complaint tracking platform with role-based authentication (JWT), status tracking workflows, and secure RESTful APIs.
- Integrated MongoDB for persistence; built React.js interfaces for admin and user roles with real-time complaint monitoring.

Diabetes Prediction System | Machine Learning, Python

[GitHub](#)

- Trained a Random Forest binary classification model using scikit-learn on a real-world healthcare dataset with full EDA and feature scaling.
- Evaluated model with accuracy, precision, recall, and F1-score metrics to validate prediction performance.

CERTIFICATIONS

AWS Certified Cloud Practitioner • AWS Academy Graduate: Machine Learning • AI for Everyone – DeepLearning.AI (Coursera) • AI Primer – Infosys Springboard

ACHIEVEMENTS

- Selected as Contributor Mentee** – GirlScript Summer of Code (GSSoC) 2026: Contributing to open-source projects as part of one of India's largest open-source programs.
- Department-Level Winner** – Smart India Hackathon (SIH) 2025: Led Team Velocity (Team ID: SIH133), coordinated full-stack development, and delivered live product demo to judges.
